Book 64 Our Town Garden

In the spring, our town plants a garden. We water our plants and pull weeds.

Worms and ants dig holes in the ground and help our plants grow.

Soon tomatoes, beans, cucumbers and peas will grow in our summer garden. We will get to pick them and eat them!

Dogs cannot play in our garden. We do not want dogs to dig holes in the ground. That would hurt our plants.

Our town square is filled with children in the summer. We play together there.

We have a picnic in the town park. We play tag and shout. We play until the sun goes down.
